

Clinician Education Series

Announcing the 2011 Hemophilia Clinician Education Series

Clinician Education Series

The Clinician Education Series is a resource for hemophilia providers. These application-based educational programs will increase the knowledge and expertise of healthcare professionals caring for persons with hemophilia.

Each is eligible for 1 continuing education (CE) credit for nurses and pharmacists.

Hemophilia

The Hemophilia Clinician Education Series has been developed by experts in hemophilia to share their clinical knowledge therapy approaches for hemophilia care. There are three programs in the series. The first provides an understanding of cause and disease process of hemophilia. The second in the series provides information on the treatments available for hemophilia. The third discusses the complications that occur in hemophilia.

Pain Management

The Pain Management Clinician Education Series is designed to guide clinicians in effective pain management for persons with hemophilia. The first two programs provide knowledge and apply the knowledge to case studies in pain management concepts and the challenges encountered in managing pain. The third program focuses on the pharmacological management of pain. Complete the series and earn 15 hours of CE credits required for eligibility to take the Pain Management Nurse Certification exam!

Professionals who would benefit from the Clinician Education Series include nurses, physicians, pharmacists, social workers, case managers and other clinicians involved in the care of individuals with hemophilia in the Hemophilia Treatment Center, hospital environment and the community.

LEARN MORE ABOUT THE CLINICIAN EDUCATION SERIES! THE PROGRAMS ARE AVAILABLE IN TWO FORMATS—LIVE ONLINE WEBINARS AND ONLINE SELF-STUDY.

Application of Pain Management Concepts

Save the Date

Thursday, October 20, 2011

8 AM PT/9 AM MT/10 AM CT/11 AM ET

Speakers:

Angela Lambing, MSN, RNCS, Hemophilia & Thrombosis Center Henry Ford Health System, Detroit, MI

Michelle Witkop, FNP-BC, ACHPA, Northern Regional Bleeding Disorder Center, Traverse City, MI

This is the **first** in a unique series of **live online webinars** that will guide clinicians in effective pain management and implementations of individualized treatment plans for persons with hemophilia.

GOAL:

The goal of this application-based program is to use the principles of pain management including scope of practice, advocacy, ethics, research and quality improvement in patient care to case studies and everyday practice.

OBJECTIVES:

- Use current standards and practices of pain management to develop individualized treatment plans
- Identify the myths of pain management and methods to address with patients
- Distinguish the emotional effects of pain and its relationship with successful treatment
- Optimize the effects of cognitive, behavioral and spiritual practices in pain management
- Develop comprehensive individualized plans for patients with complicated pain management needs using suggested tools, resources and recommendations

This program is eligible for 1 continuing education (CE) credit for nurses and pharmacists.

Complete the series and earn 15 hours of CE credits required for eligibility to take the Pain Management Nurse Certification exam!

LIVE

Live at the 63rd Annual National Hemophilia Foundation (NHF) Meeting:

Surgical Management of Persons with Hemophilia

**Thursday, November 10, 2011
8 AM to 11 AM CST**

Hyatt Regency, 151 East Wacker Drive, Chicago, IL 60601

Room TBD

Speakers:

*Sharon Funk, PT
University of Colorado, Denver;*

*Sue Geraghty, RN
University of Colorado, Denver;*

*Kristen Jaworski, RN, BSN
Hemophilia Center of
Western Pennsylvania;*

*Jennifer Maahs, RN, PNP,
MSN Indiana Hemophilia
and Thrombosis Center;*

*Mauricio Silva, MD Los
Angeles Orthopedic Hospital*

Surgical Management of Patients with Hemophilia will address the educational needs of clinicians who care for these patients. As the hemophilia population is aging and there are advances in orthopedics, more people with hemophilia are having surgical procedures. It is important for clinicians to understand the clinical requirements and practices to ensure the best possible outcomes. This program is designed to provide the clinical information to care for pediatric and adult patients with hemophilia—pre-, peri- and post-operatively. This program is eligible for 3 continuing education (CE) credits for nurses and pharmacists

GOAL:

The goal of this application-based program is to provide knowledge of the current practices in the care of pediatric and adult persons with hemophilia—pre-, peri- and post-operatively.

OBJECTIVES:

- Understand importance of pre-operative assessments needed for persons with hemophilia
- Provide educational tools used pre-, peri- and post-operatively
- Discuss surgical options and progression seen in persons with hemophilia
- Illustrate the importance of communication between the HTC team and the intra-hospital staff during the pre-, peri- and post-operative period
- Describe post-operative care and planning of supportive therapy required for the person with hemophilia

Managing the Challenges Associated with Pain Management

Save the Date

Thursday, March 15, 2012

8 AM PT/9 AM MT/10 AM CT/11 AM ET

Speakers:

Angela Lambing, MSN, RNCS,
Hemophilia & Thrombosis Center
Henry Ford Health System, Detroit, MI

Michelle Witkop, FNP-BC, ACHPA,
Northern Regional Bleeding Disorder
Center, Traverse City, MI

This is the **second** in a unique series of **live online webinars** that will guide clinicians in effective pain management and implementations of individualized treatment plans for persons with hemophilia.

GOAL:

The goal of this application-based program is to provide an understanding of the challenges that may be encountered as part of the pain management cycle and discuss strategies to overcome these challenges.

OBJECTIVES:

- Understand the importance of assessing, preventing and managing side effects of the therapies prescribed
- Define the difference between allergic reaction, side effect, adverse reaction and tolerance in drug therapy
- List coping strategies and support systems available to support pain management efforts
- Explain the appropriate management of pain crisis events
- Discuss the importance of patient education and barriers to a treatment plan

This program is eligible for 1 continuing education (CE) credit for nurses and pharmacists.

Complete the series and earn 15 hours of CE credits required for eligibility to take the Pain Management Nurse Certification exam!

Application of Pharmacological Management of Pain

Save the Date

Thursday, May 10, 2012

8 AM PT/9 AM MT/10 AM CT/11 AM ET

Speakers:

Angela Lambing, MSN, RNCS,
Hemophilia & Thrombosis Center
Henry Ford Health System, Detroit, MI

Michelle Witkop, FNP-BC, ACHPA,
Northern Regional Bleeding Disorder
Center, Traverse City, MI

This is the **third** in a unique series of **live online webinars** that will guide clinicians in effective pain management and implementations of individualized treatment plans for persons with hemophilia.

GOAL:

The goal of this application-based program is to apply knowledge of the appropriate use of the pharmacological and non-pharmacological treatment options for acute and chronic pain available to hemophilia patients.

OBJECTIVES:

- Recognize and create patient treatment plan using opioid and non-opioid pain management options
- Apply the use of the adjuvant therapies available and their benefits to complex pain management situations
- Develop non-pharmacological treatment strategies
- Demonstrate understanding of current practices of routes, administration and individualized treatment regimens for pain management

This program is eligible for 1 continuing education (CE) credit for nurses and pharmacists.

Complete the series and earn 15 hours of CE credits required for eligibility to take the Pain Management Nurse Certification exam!
